per-Ripley Hill Benevalence. The Ladies' Aid society of the Raptist church gave a bean-supper Wed-nesday evening, which was well pat-ronized. Soda crackers are extremely sensitive to moisture.

Before the advent of Uneeda Biscuit the only persons who ever tasted fresh, crisp soda crackers were the people in the bakeries.

Imagine their trip from bakery to your table; exposed to air and moisture—kept in grocers' boxes and finally in a paper bag on the shelf in your pantry. Could they be the same as they were the day they were baked?

Now that we have Uneeda Biscuit—we have perfectly baked soda crackers -perfectly kept.

No moisture can reach them-no contaminating influences can affect their flavor—their goodness is imprisoned only to be liberated by you for you when you open the package.

Always in the moisture proof package. Never sold in bulk. 5 cents a package.
